

TOWN OF CUTLER ROAD TOUR EVALUATION MEETING
SATURDAY, May 27, 2023
CUTLER TOWN ROADS; Camp Douglas, WI

Town Board Members in attendance: Martin Potter (Chairman), Bobbie Georgeson (Clerk), Curt Jorgensen (Supervisor), Jim Hayward (Supervisor), Terry Hayward (Treasurer). Also in attendance were Allen Jessen, Bobby Shaw, and Steve Bezemek (Regional Mgr. Scott Construction).

Martin called the meeting to order at 8:00 a.m.

Due to the high cost of seal coating, and the town's limited budget, only the top needs and special concerns were reviewed at this time.

Findings:

50' 2nd Ave repair of 2' bar at Marten's driveway (wood hauler damage)

854' 2nd Ave. curve North of townhall (wedging in & out)

2165' 2nd Ave. North – Single Seal West from curve to County Road H.

3930' on Eisfeldt Road will need double seal (future), current Rip Rap East of curve on Eisfeldt.

1461' 22nd St – Single Seal WITH 1090' Double Seal East off County Road H.

400' 22nd St – Double Seal WITH 350' Single Seal West off County Road M.

Cutler Drive TRIP project, need verbiage for bids (not viewed during today).

5th Ave (gravel/sand section), Grading looking good, but concerns over the "burm" along roadsides. Maybe a way to "reclaim" that gravel for use?!

5th Ave (North of intersection of 25th) hand patching areas

Patch work on River Road consists of approximately 160' where the road has been torn up, WITH 2650' single seal.

6th Ave (near STOP sign at County Road M) Patch hole. Possible future TRIP project to rebuild road from County Road M to previous Road project (West).

3962' 6th Ave (front of Woggon Farms) EMULSION WITH 2619' 25th St from 6th Ave intersection to 5th Ave intersection.

200' 23rd St section Single Seal where "degrading" from previous project.

Scott Construction will mail quotes on the necessary sections, to give town idea of what is needed.

Meeting Adjourned at 10:15 a.m.
Bobbie K Georgeson, Clerk
